

RESPONSIVE CONTENT: RE-ARCHITECTING THE BASIC PAGE, RENDER API, ETC.

A core conversation
with John Albin Wilkins

In which we discuss the implications for
Mobile, WYSIWYG, Render API, the Database, Design Patterns,
Semantics (HTML5/Aria/Microformats/RDFa), the Basic Page,
Responsive Design, and Unstructured Data

Chocolate + Peanut Butter
= Peanut butter cups

Ponies + Unicorns
= Ponycorns

**Responsive layouts + Responsive content
= One web**

- Render API is like moon walking
- Its very cool. And helps you get dates.
- And its a powerful dance move.
- We're either moving in the right direction and facing the wrong way around.
- Or we're facing the right way and moving in the wrong direction. I can't really tell.
